PROFESSIONAL SUMMARY

Computer Systems Engineering student at UET Peshawar with hands-on experience across full-stack web development, database design, and embedded systems. Skilled in Python, JavaScript, PHP/Laravel, and SQL, with practical exposure to AI integration, prompt engineering, and machine learning fundamentals through an active AI internship. Working knowledge of digital logic design, FPGA concepts, and microcontroller programming from coursework and hardware projects. Strong foundation in data structures, algorithms, and object-oriented programming, complemented by a fast-learning mindset and effective teamwork. Passionate about building scalable, efficient software and hardware solutions.

CORE COMPETENCIES

Languages	Frameworks & Tools	AI & Data	Engineering
- C / C++ - Python - JavaScript - PHP - SQL - HTML / CSS	- Laravel - Flask - Bootstrap - Git & GitHub - VS Code	- Prompt Engineering - OpenRouter / ChatGPT API - Machine Learning - Power BI - Data Analysis	- Digital Logic Design - FPGA / Verilog HDL - MSP430 / Embedded C - Computer Architecture - OOP & Data Structures

PROFESSIONAL EXPERIENCE

Data Analytics Intern

Jan 2026 – Mar 2026

Elevvo

- Processed and analyzed datasets to identify trends, patterns, and performance metrics, developing SQL queries and reports to support business decision-making.
- Performed data validation, cleaning, and transformation to improve data quality.
- Collaborated with cross-functional teams to deliver analytical insights and reporting solutions.

AI Intern

Jun 2025 – Oct 2025

MLSA UET Peshawar

- Developed machine learning models for predictive analysis as part of an academic AI research initiative.
- Collaborated with peers on AI research topics and contributed to hands-on technical workshops.

Graphic Designing Intern

Aug 2024 – Oct 2024

Cycarts

- Contributed to visual branding, educational assets, and user-centric design layouts for digital platforms.

PROJECTS

Vendor Performance Analytics — SQL, Python, Power BI

Built an end-to-end business intelligence solution analyzing vendor profitability and inventory turnover, translating raw data into actionable dashboards.

Dream Team Analyzer — Python, Flask, AI/ML, Web Scraping

Developed a Flask-based web application using AI and web scraping to generate data-driven team performance insights and recommendations.

AI Prompt Repository (PromptHub) — Flask, MariaDB, OpenRouter API

Built a full-stack prompt management platform with favorites, project organization, and execution history, backed by a normalized relational database schema.

Bluetooth-Controlled Soccer Robot — ESP32, Embedded C/C++, L298N Motor Drivers

Designed and built a remotely controlled soccer-playing robot using ESP32 with Bluetooth communication for real-time motor control.

SFML Arkanoid Game — SFML, Object-Oriented Programming

Recreated the classic Arkanoid game with collision detection and level-state management, applying OOP design principles.

EDUCATION	CERTIFICATIONS	SKILLS
Bachelor of Science Computer Systems Engineering University of Engineering and Technology (UET), Peshawar (3.64/4) Expected Graduation: 2027	- Python for Data Science – IBM - Machine Learning with Python – IBM - Generative AI Web App Dev – Pak Angels/HEC - Data Analytics & BI – DigiSkills - Big Data Foundations – IBM - Art of Prompting – IBM	- Full-Stack Web Development - Database Design & SQL - AI Integration & Prompt Engineering - Embedded Systems & FPGA Basics - Version Control (Git/GitHub) - Data Structures & Algorithms
